- 1,500 gallon polyethylene water tank
- Cold-weather ready
 - Heated personnel enclosure
 - Optional heated boxes for all-weather system maintenance / operation
 - Optional boiler system

WHY A VAC-CON EXT

The X-Cavator EXT is designed to take on the harshest of environments while performing non-destructive soft digging.

High-pressure water and powerful vacuum allows operators to locate, dig, and excavate without disturbing the surrounding jobsite or underground utilities.

Operator enclosure offers heated storage and break space with operators in the field.

Lightweight, flexible boom design rotates 310-degrees horizontally and +45/-22 degrees vertically.

Single cyclone with final cartridge style filter.

Wireless belly pack operation.
