VacHunter

SideKick

100-200 Gallon Vacuum System

A small but effective vacuum package that can be added to truck and trailer jets. A simple bolt-on attachment to the existing power system allows for 500-700 CFM of vacuum to be added. This allows for up to 15" of vacuum to resolve minor vacuum issues in the field.

Hose Reel Enclosure

Cold weather protection is important for our customers that work in extreme cold. This hose reel enclosure features aluminum roll up doors, access panels for easy repairs, and diamond treadplate construction. The entire assembly articulates as well.

Dual Hose Reels

Dual reels allow for the flexibility that most municipalities and contractors demand. Small and large jobs can be tackled with ease on the same unit. Ask how we can create a custom reel for your unit.

Custom Tool Boxes/Storage

Many standard size tool boxes are available for any configuration. Custom shelf and racks available upon request. Need a rack for your downhole tools? Let us know!

Bed Liner Frame/Reel Coating

This is a durable and tough HDPE coating applied before any major components are installed. Better than any automotive quality paint, this will keep your unit looking great in the long run.

Digital Footage Counter

This simple and easy to install counter for any setup. A backlit LCD display makes this easy to use at night. The counter wheel mounted to the levelwind make this a very accurate way to maintain your footage count.

500 & 800 Gallon Vacuum Trailer

3" 4" 6"

VacHunter Trailer

- 500 or 800 gallon capacity debris tank
- Diesel engine
- Giant water pump
- Dual aluminum water tanks
- Diamond treadplate decking
- Tandem torsion axles
- Optional extendable boom
- Available vacuum systems:
 - 500-2100 CFM
- Available water systems:
 - 3000 PSI @ 4-10 GPM

500 Gallon Combination Trailer

3" 4" 6"

Mini-Combo VacHunter

- 500 or 800 gallon debris tank
- Diesel engine
- Rear mounted hose reel
- Giant water pump
- Dual aluminum water tanks
- Diamond treadplate decking
- Tandem torsion axles
- Optional extendable boom
- Available vacuum systems:
 - 500-1100 CFM
- Available water systems:
 - 2000-3000 PSI @ 18-40 GPM

Single Axle Trailer Jet

3/4"

1/2"

- Diesel engine
- Giant water pump
- 300 gallon HD Polyethylene water tank
- 3/8" high tensil steel hose reel construction
- Custom rolled frame
- Diamond treadplate decking
- 600-800 ft. capacity reel
- Available water systems:
 - 2000 to 4000 PSI
 - 10-80 GPM

JETEYECAMERA Ready

Tandem Axle Trailer Jet

JET EYE CAMERA Ready

JETEYECAMERA

Jet Eye Camera System

The Jet Eye Camera System (Patent Pending) is the fastest and easiest way to evaluate what is going on in your sewer system. This tough system lets any jet operator step up to the next level with real-time video of what is going on in the pipe. A digital recording system that encodes all videos directly to a USB flash drive for easy review and archiving. The components are all constructed from non-corrosive aluminum and stainless steel for a long productive life in the sewer. No fancy cameras or exotic technology keeps this system out in the field and easy to troubleshoot. This system can be installed on your Combo Truck, jetting truck or trailer jetter in a few hours. Call today to schedule an on-site demonstration.
